THE "READY TO EAT" CONCEPT IS THE NEW SIGN OF RECOGNITION OF LUKOIL SERBIA PETROL STATIONS

A food concept called "Ready to Eat" was introduced at three gas stations of LUKOIL SERBIA. This project was developed with the aim of providing the guest with a real, hot meal that is cooked in a professional kitchen and according to homemade recipes just for him, and at the same time it arrives on the table quickly, within a few minutes. Well-known specialties prepared with the guaranteed high quality of ingredients and the use of technologically advanced appliances are introduced to the offer of the restaurants at the "Aerodrom", "Dobanovci-jug" and "Mihajlovac 2" gas stations. The assortment was completed by some of the favorite dishes, such as: stuffed peppers, chicken fillet, chicken drumsticks and sticks, beef stew, lasagna in several ways, moussaka with eggplant and chicken nuggets.

The break for all drivers and passengers in these LUKOIL SERBIA facilities is now much more comfortable and brings pleasant culinary surprises that are not characteristic of a regular gas station, so drivers do not have to choose between the quality of a home-cooked meal and the speed of its serving.
